Professional Summary

Computer Science (AIML) undergraduate at GITAM University with strong foundations in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Software Development. Experienced in Machine Learning, Computer Vision, and AI-powered solutions. Passionate about building scalable software products and solving real-world engineering problems.

Technical Skills

Languages: Python, Java, C, JavaScript

Web Technologies: HTML, CSS

Databases: SQL, MySQL

Core Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, REST APIs

Machine Learning: Machine Learning, Deep Learning, Computer Vision, OpenCV, TensorFlow/Keras, Scikit-learn

Tools: Git, GitHub, VS Code, NumPy, Pandas, Matplotlib

Cloud: AWS Fundamentals

Projects

CropDoctor – AI-Powered Crop Disease Detection System

- Developed an AI-powered crop disease detection system using Machine Learning and Computer Vision.
- Built a solution to identify plant diseases from leaf images for early diagnosis.
- Implemented image processing techniques using Python and OpenCV.
- Designed an interface for agricultural support applications.

House Price Prediction using Linear Regression

- Developed a predictive analytics model to estimate house prices using Linear Regression.
- Performed data preprocessing, feature selection, and model training.
- Evaluated model accuracy and visualized trends using real-estate datasets.

Mall Customer Segmentation

- Built a customer segmentation model using K-Means clustering.
- Categorized customers based on purchasing behavior and spending patterns.
- Generated insights for targeted marketing strategies.

Cats vs Dogs Classification using SVM

- Developed an image classification model using Support Vector Machines.
- Processed image datasets and extracted features for classification.
- Evaluated performance using accuracy metrics.

Hand Gesture Recognition using Deep Learning

- Developed a deep learning-based hand gesture recognition system.
- Utilized Computer Vision and Neural Networks for gesture classification.
- Implemented preprocessing and feature extraction pipelines.

HVAC Systems Monitoring and Analytics

- Developed a monitoring solution for HVAC systems using sensor data.

- Implemented analytics workflows for operational performance tracking.
- Generated insights for efficiency improvement and predictive maintenance.

Experience

Machine Learning Intern — SkillCraft Technology 2026

- Worked on data preprocessing, feature engineering, and machine learning workflows.
- Assisted in model training, evaluation, and performance improvement.
- Collaborated on real-world AI projects using structured datasets.

Education

GITAM University, Bengaluru 2023 – 2027

Bachelor of Technology in Computer Science and Engineering (AIML)

CGPA: 8.08

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning

Certifications

- Salesforce Certified Agentforce Specialist
- Networking Basics – Cisco Networking Academy
- Mastering Advanced Generative AI Models – GITAM Workshop

Achievements

- Runner-Up – Internal Smart India Hackathon 2025
- NCC 'A', 'B', and 'C' Certificate Holder
